

## 144W UV-C Dual Function Airflow Unit (160 M<sup>3</sup>/hr)

### UVDS0014-W

A powerful Dual function unit designed for continuous operation in an office, reception area or waiting room. The silent fan draws in air and passes it across the dual 72W Philips UV-C sterilisation lamps at a rate of 160 cubic meters per hour. This gives all of the benefit of a permanent UV-C cleaning source without exposure to the lamps. Unlike an Air purifier this unit contains no filter media (although these can be retro fitted if required) there is no maintenance schedule required. The front cover can be removed to use the unit for direct surface sterilisation, so we class this as dual function. Its designed to silently work in the background protecting your patients and staff.

### Benefits

- 144W Philips UV-C Lamps
- Silent Air treatment of contaminants.
- Long lamp Life 9,000 hours
- Traditional UV-C source low pressure lamp
- Powder coated white all steel construction

### Applications

- Continuous use areas
- Meeting rooms
- Waiting Rooms
- Reception areas
- Offices and studios

### Features

- Designed for silent continuous use
- White Powder coated body
- Elegant modern design
- Dual functionality powerful fan.
- Stainless Steel on/ off button

### Safety

- Enclosed Light source
- On / off Button
- Ceramic lamp Holders
- Sturdy steel construction (anti topple base)
- Built in carry handle

# UVDS0014-W

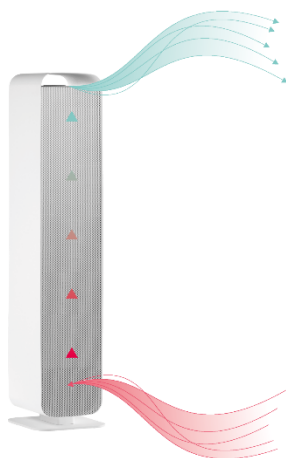

<b>Approval</b>	<b>CE Marked</b>
Technology	LP Mercury
<b>Wavelength</b>	253.7 Nm
Ozone generation	No
Weight	8 KGs
<b>Voltage</b>	220 V 50Hz
Wattage	144 W
Tube material	Quartz Glass
<b>Mechanical and Housing</b>	Powder coated Steel
Power source	UK Standard 3 Pin
